New in 2025

Bibliographic corrections improvements

- Includes changes to BookNet Canada's Internal Admin tool
- SalesData team has much better visibility into an ISBN's bibliographic data in SalesData, including:
 - Insight into whether the data is coming from the regular biblio feed or a manual correction reported by a user
 - If a biblio record is currently locked or unlocked
 - History of past instances in which a record was locked
- Users can also now submit biblio corrections for Dewey Decimal numbers

[Report bibliographic errors](#)

Support for Sierra libraries

- We can now receive library reports from libraries using Sierra!
- Libraries must be on version 6.3 in order to participate

MBLT bug fixes and column sorting

- Bug fix to allow users to view all past merge requests in the Media Bestseller List Tool
- Addition of column sorting on the Merge Request and Suppression Request Tables
